(201a)
(201b)
(201c)

Class (202)	Principle Text: (203)	Cross Reference (204)	Ref # (205)
Principle	Keep it simple stupid.		1
Mission	We provide superior design services at low cost.		2
Goal	We want this tool to save us time and improve the quality of our deliverables		3

Fig. 2

	Class (302)	Requirements Text: (303)	Cross References: (304)	REF # (305)
(301a)	Risk	There is a risk that our Method may change over time.	5	6
(301b)	Issue	Customers use a competitor's productivity tools	4 8	7

Fig. 3

	Class (402)	Issues Text: (403)	References: (404)	REF # (405)
(401a)	Standard	We will be using Lotus productivity tools		4
(401b)	Standard	We will be implementing the classes according to IBM's Design Method		5

Fig. 4

(501a)

Class (502)	Current Decisions Text: (503)	References: (504)	REF # (505)
Design	We will implement the design template in Lotus Word Pro because a document compatible with other products can be generated from it.	4,7	8
